

FORM 51-101F1
STATEMENT OF RESERVES DATA
AND OTHER OIL AND GAS INFORMATION
METALORE RESOURCES LIMITED

This reserves and cash flow evaluation of Metalore Resources Limited was prepared on April 27, 2020 using production and revenue data up to and including March 31, 2020 in a report entitled Metalore Resources Limited Reserves and Present Value Estimate as of March 31, 2020 prepared by Jim McIntosh Petroleum Engineering Ltd. The results of this report are summarized in the tables below.

All of Metalore Resources Limited natural gas assets are located onshore in south-western Ontario, Canada. The company has 100% working interests in 80 producing Silurian-aged Thorold/Grimsby sandstone gas wells in the Charlotteville Township area of Norfolk County and 52% working interests in 5 shut-in Silurian-aged Thorold/Grimsby sandstone gas wells in Houghton Township, Norfolk County. In addition to the producing wells, Metalore has undeveloped but highly prospective acreage in both areas.

The natural gas price anticipated for Metalore gas sales in 2020 in this reserves report is significantly lower than that expected based on the Mar 31, 2019 reserves report (This report price: \$3.69/Mcf versus Mar 31, 2019 report 2020 gas price: \$4.80/Mcf). This lower short-term natural gas price has reduced both the NPV of future gas and the expected recoverable reserves.

With the continued lower natural gas prices Metalore has announced in their filings that further gas development will not occur until there is an appropriate improvement in natural gas prices. As a result, the future modest drilling program has been postponed by two years in this reserve evaluation.

FORM 51-101F2
REPORT ON RESERVES DATA
By INDEPENDENT QUALIFIED EVALUATOR

To the board of directors of Metalore Resources Limited (the “Company”)

1. I have evaluated the Company’s reserves data as at March 31, 2020. The reserves data are estimates of proved reserves and probable reserves and related future net revenue as at March 31, 2020, estimated using forecast prices and costs.
2. The reserves data are the responsibility of the Company’s management. My responsibility is to express an opinion on the reserves data based on my evaluation.

I carried out my evaluation in accordance with standards set out in the Canadian Oil and Gas Evaluation Handbook (the “COGE Handbook”) prepared jointly by the Society of Petroleum Evaluation Engineers (Calgary Chapter) and the Canadian Institute of Mining, Metallurgy & Petroleum (Petroleum Society).

3. Those standards require that I plan and perform an evaluation to obtain reasonable assurance as to whether the reserves data are free of material misstatement. An evaluation also includes assessing whether the reserves data are in accordance with principles and definitions presented in the COGE Handbook.
4. The following table sets forth the estimated future net revenue (before deduction of income taxes) attributable to proved plus probable reserves, estimated using forecast prices and costs and calculated using a discount rate of 10 percent, included in the reserves data of the Company evaluated by me for the year ended March 31, 2020, and identifies the respective portions thereof that I have evaluated and reported on to the Company’s management:

Independent Evaluator	Report Date	Reserves Location	Audited (M\$)	Evaluated (M\$)	Reviewed (M\$)	Total (M\$)
Jim McIntosh Petr Eng	27-Apr-20	Ontario		\$5,385.2		\$5,385.2
Total				\$5,385.2		\$5,385.2

5. In my opinion, the reserves data respectively evaluated by me have, in all material respects, been determined and are in accordance with the COGE Handbook. I express no opinion on the reserves data that I reviewed but did not audit or evaluate.
6. I have no responsibility to update my reports referred to in paragraph 4 for events and circumstances occurring after their respective preparation dates.
7. Because the reserves data are based on judgments regarding future events, actual results will vary and the variations may be material. However, any variations should

be consistent with the fact that reserves are categorized according to the probability of their recovery.

Executed as to my report referred to above:

Jim McIntosh Petroleum Engineering Ltd
